

NOTHING ACTIVATES THE BRAIN SO EXTENSIVELY AS MUSIC

- Dr. Oliver Sacks

MEDRhythms Teletherapy
Neurologic Music Therapy Services.
Anytime. Anywhere.

Goal areas we treat

- Sensorimotor
- Speech & Language
- Cognition

Setting

- Online, in the comfort and privacy of your home

Types of Communication

- Stable internet connection
- Computer, phone or tablet with web camera

Populations we serve

- Traumatic Brain Injury
- Alzheimer's Disease
- Parkinson's Disease
- Autism
- Stroke
- Multiple Sclerosis
- Other neurologic diseases

Music activates cognitive, motor, and speech centers in the brain through accessing shared neural systems.

Treatment techniques are based on the scientific knowledge of music perception and production and the effects of this treatment on nonmusical brain and behavior functions.

Based on neuroscience research, we apply music as a unique tool in neuro-rehab to facilitate and maximize neuroplasticity.

MedRhythms Teletherapy brings these services from the clinic into your home no matter where you live. The initial consultation is complimentary, and our team will help you every step of the way!

45 minute session: \$ 75
