Caregiver Experiences in Aphasia

Research Study Recruitment Flyer

Are you caring for a family member or loved one with aphasia?

We invite you to take part in a research study that explores the experiences of caregivers of individuals with aphasia. This study aims to better understand caregiving responsibilities, emotional well-being, family and social support, financial concerns, and access to helpful resources and services.

Who can participate?

- Adults 18 years or older
- Family members or informal caregivers of a person with aphasia
- Participants from the United States or India

What will participation involve?

- A one-time online survey
- Approximately 10–15 minutes to complete
- You may skip questions or stop at at any time

Important information

- Participation is voluntary
- Responses will be kept confidential
- This study has IRB approval

Why participate?

Your responses may help researchers and clinicians better understand caregiver needs and improve support for families affected by aphasia.
